

DEPLOY

LIGHTNING FAST
SOFTWARE DEPLOYMENT

Powered by **Faronics Cloud**

LIGHTNING FAST DEPLOYMENT OF APPLICATIONS, WINDOWS UPDATES AND OPERATING SYSTEMS

Faronics Deploy is the fastest and easiest way to deploy applications, patches, and operating systems to managed devices. Deploy also lets you take an inventory of your deployment and remote into your machines over the web.

LIGHTNING FAST ACTIONS

Act instantly by performing **on-demand actions** such as installing applications, Windows patches, or remoting to computers. Power on computers and perform maintenance tasks when necessary.

STAY SECURE

In addition to patching Windows and application vulnerabilities, implement Faronics Anti-Virus for **comprehensive protection** from malware and security threats.

SCALABLE CLOUD CONSOLE

Manage any number of computers independently without choking local resources or bandwidth with the decentralized **cloud-based** architecture

REAL-TIME, INTUITIVE INTERFACE

The always-connected Control Grid makes managing your computers a **live-visual experience**. Accessibility options like Dark Mode and Enhanced Contrast make it easy on the eyes.

CONTROL FROM ANYWHERE

Support your end users from anywhere in the world. Remote into computers, deploy software and update patches from a **single web-based console**. No middleman server is required.

MULTI-PLATFORM CONTROL

Perform application updates, inventory devices, and remote over the web for **Windows and Mac** operating systems.

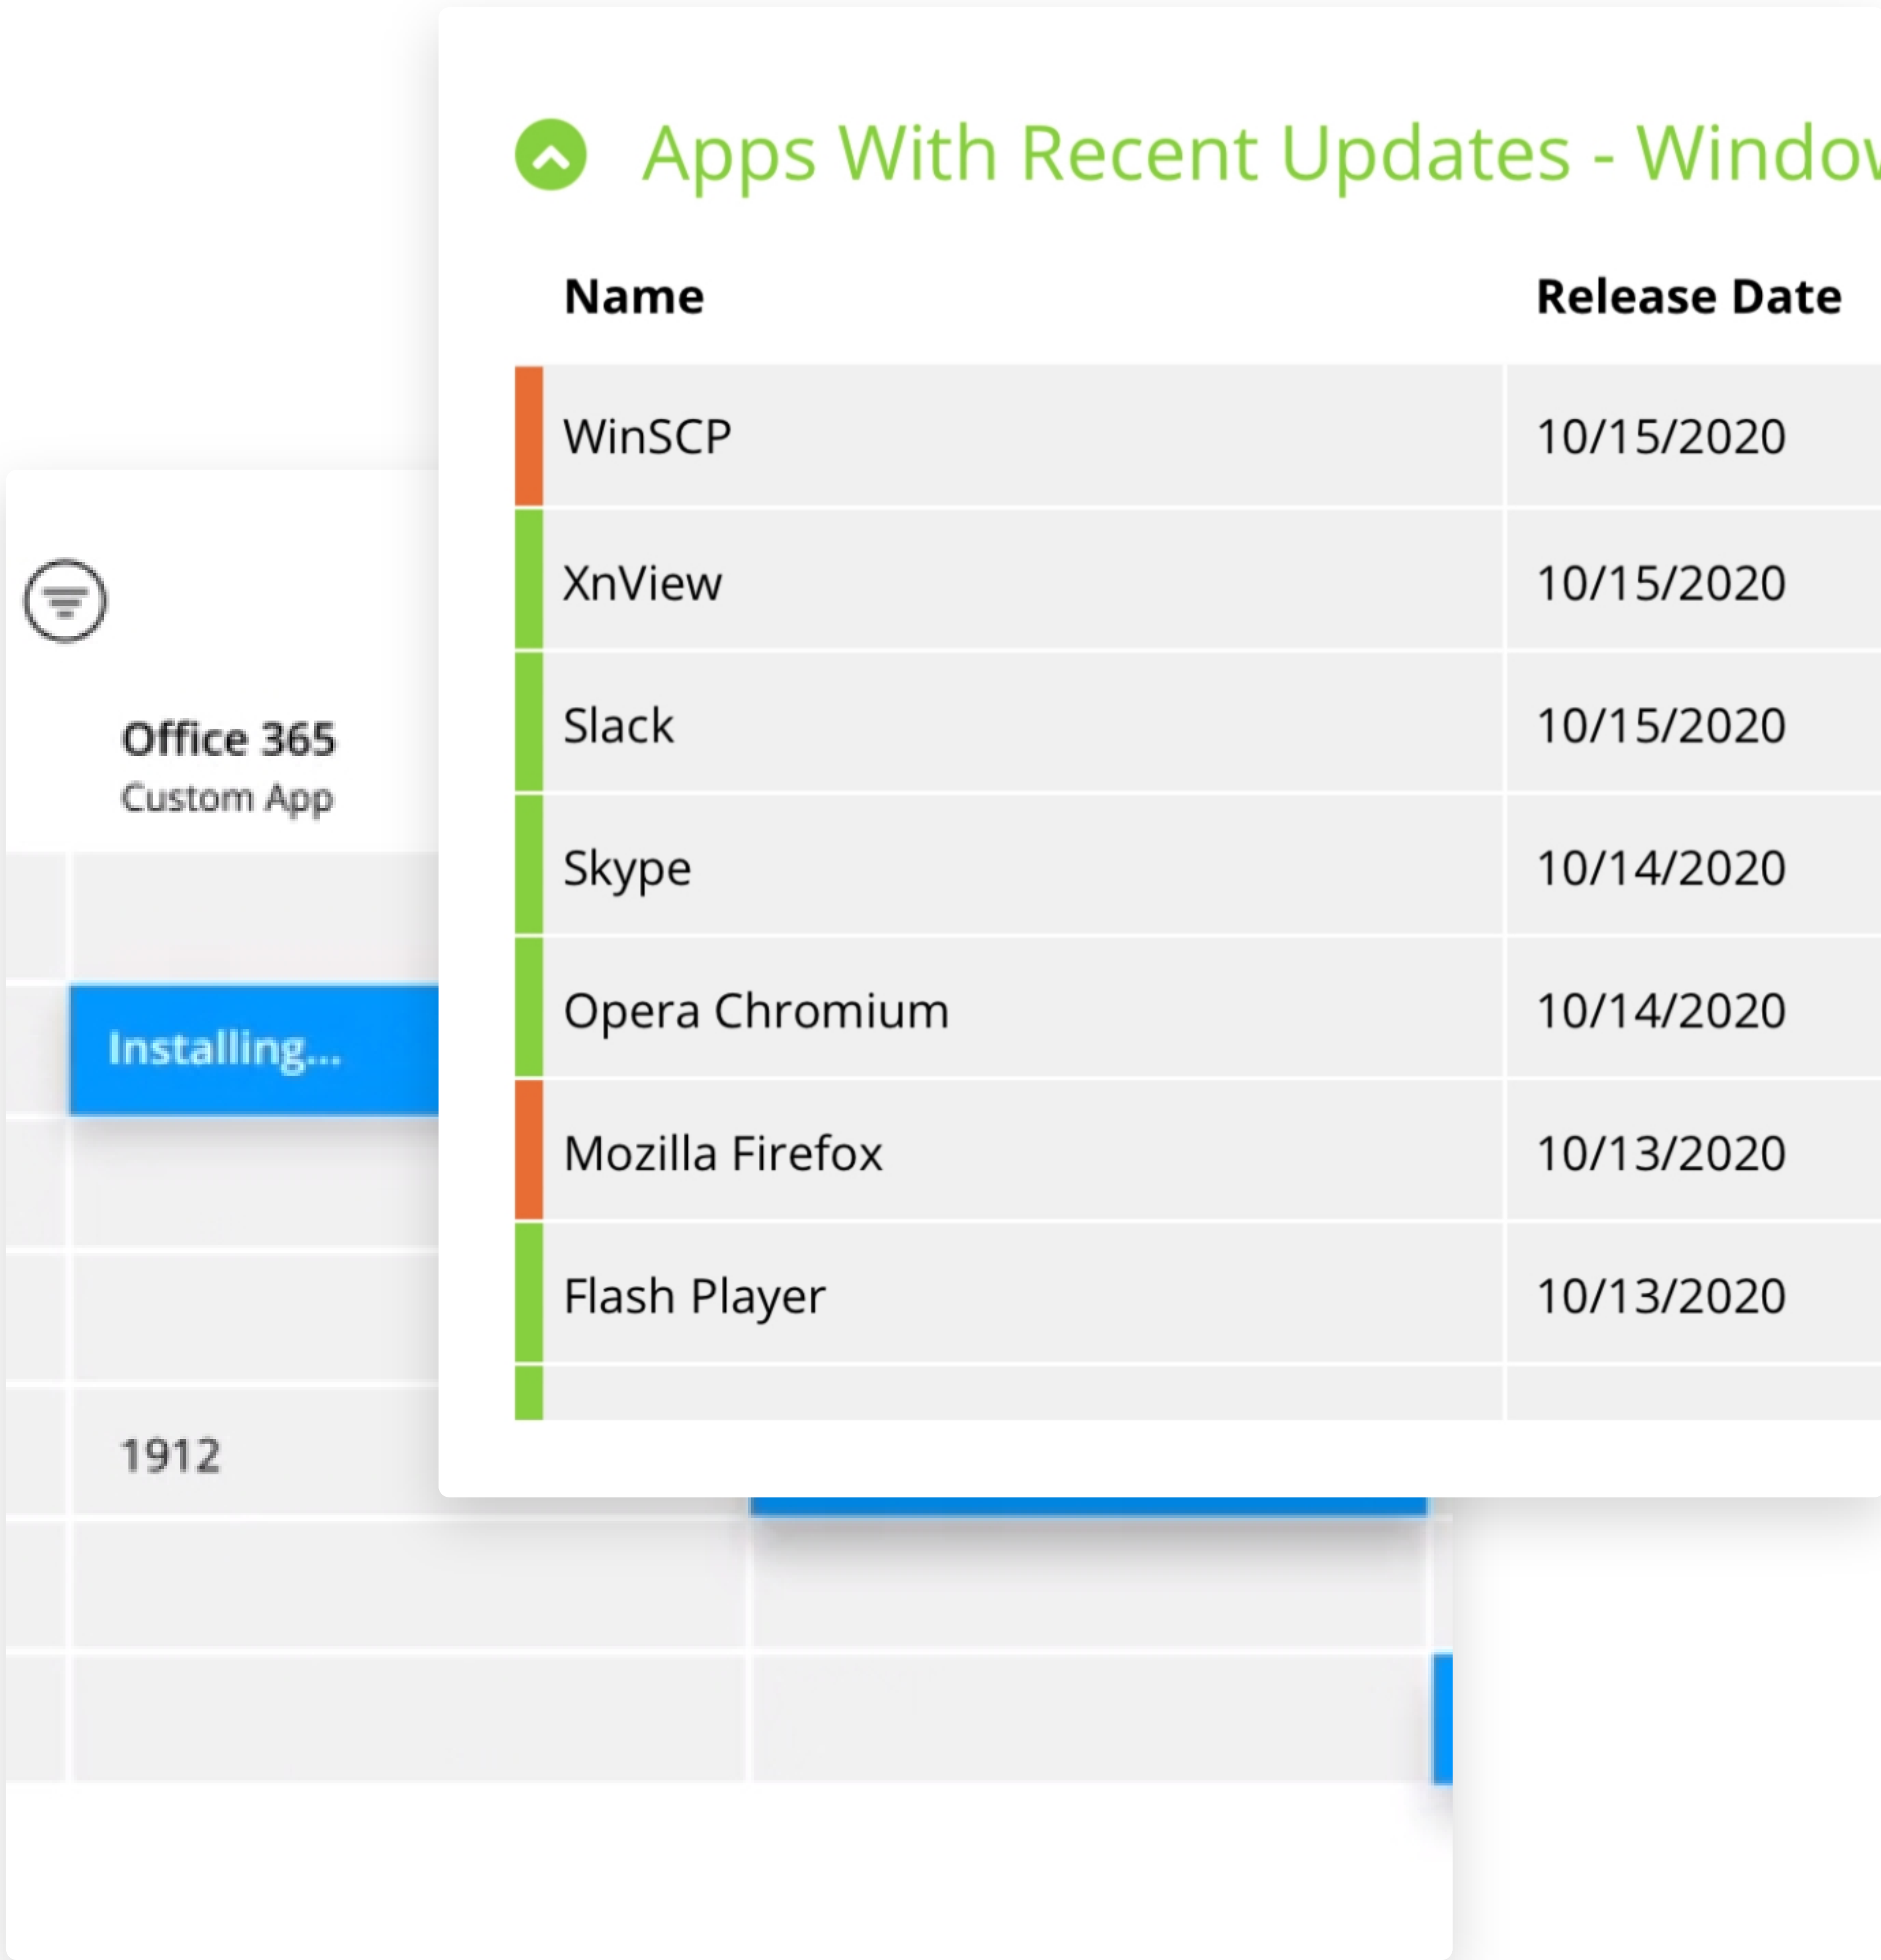

APPLICATION MANAGEMENT

SET UP, DEPLOY AND AUTOMATE UPDATES FOR ANY APP INSTANTLY

Faronics Deploy uses an agent-based setup to manage applications. After the initial scan, computers are listed in a grid with application versions across categories available for drill-down. The application-based policy management interface lets you set up a completely automated application management solution.

FEATURES

- Automated updates for Windows and Mac
- Manage any application including MS Office or Adobe Suite instantly
- Works without user intervention
- Cache server to optimize bandwidth

WINDOWS UPDATES

AUTOMATE DISCOVERY, TESTING, AND DEPLOYMENT OF WINDOWS UPDATES

After an initial Patch Scan, managed computers are listed in a grid with pending updates across different patch categories available with a drill-down function. The category-based policy management interface lets you set up a completely automated patch management solution or a test-and-approve process for computers in a production environment.

FEATURES

- Up-to-date patches with on-demand patch scanning
- Granular policies with selective updates
- Test before deploy with approval process
- Pull updates from cache or WSUS infrastructure

Pending Windows Updates

Patch Name

- 2020-10 Cumulative Update for Windows 10 Version 2004 for x64-based Systems (KB457)
- 2020-10 Security Update for Adobe Flash Player for Windows 10 Version 2004 for x64-ba
- Windows Malicious Software Removal Tool x64 - v5.83 (KB890830)
- Feature update to Windows 10, version 2004
- 2020-01 Update for Windows 10 Version 1909 for x64-based Systems (KB4497165)
- Security Intelligence Update for Windows Defender Antivirus - KB2267602 (Version 1.307
- 2020-01 Cumulative Update for .NET Framework 3.5 and 4.8 for Windows 10 Version 190

OS DEPLOYMENT

Faronics Deploy | 2020

FAST, MODULAR OS DEPLOYMENT MANAGED FROM THE CLOUD

Faronics Deploy uses an Imaging Server that requires a one-time setup on any Windows computer, Server OS not required. Using this as a synced repository and relay, imaging tasks can be pushed to computers in the same network as the imaging server through the Deploy Cloud Console. Once the Deployment Packages have been set up, deployment is a one-click operation.

FEATURES

Modular File based OS deployment

Capture, deploy one golden image on varied hardware

Install Settings including disk partitions, express OOBE

Supports Cloud-based management of WDS setups

REMOTE CONTROL

REMOTELY CONNECT TO ENDPOINTS AND CHAT WITH USERS

IT Administrators can choose to view and take full control of endpoints or choose to shadow a user to assist with setting up an application, printer or help carry out other tasks that require IT assistance.

FEATURES

Remote-in over the web via RDP or VNC

Wake up, shut down all computers in one click

Remote PowerShell execution capabilities

Analytics for computer and application usage

INVENTORY AND ANALYTICS

Faronics Deploy | 2020

GET A REAL-TIME HARDWARE INVENTORY REPORT

Keeping track of IT hardware and understanding hardware configuration, and usage is a vital part of planning IT changes effectively. Get a real-time Hardware Inventory Report that includes details on Operating Systems, Disk Usage, Network and User Settings and hardware - including service oriented details like Manufacturer, Service Tag and Model Numbers.

FEATURES

Monitor usage of your IT assets

Application installation and usage data

Real-time Hardware Inventory Reporting

Diagnose system issues with MSINFO

Drive Details				
	Drive 1 (System)	Drive 2	Drive 3	
Name	WDC WD5000AAKX-603CA0	Generic- MS/MS-Pro/...	Generic- SM/xD-Pict...	S
Serial No	WD-WMAYUC096890	20060413092100003	20060413092100001	5
Type	Fixed	Removable	Removable	R
Partition 1	C (C:): 68 / 69 GB			

CONFIGURATION MANAGEMENT

APPLY CONFIGURATION CHANGES TO CUSTOMIZE WINDOWS ON THE GO

Faronics Deploy makes it extremely easy to customize Windows. You can now quickly change computer-specific settings, change control panel settings, rename computers, disable startup items and reclaim disk space with a few clicks.

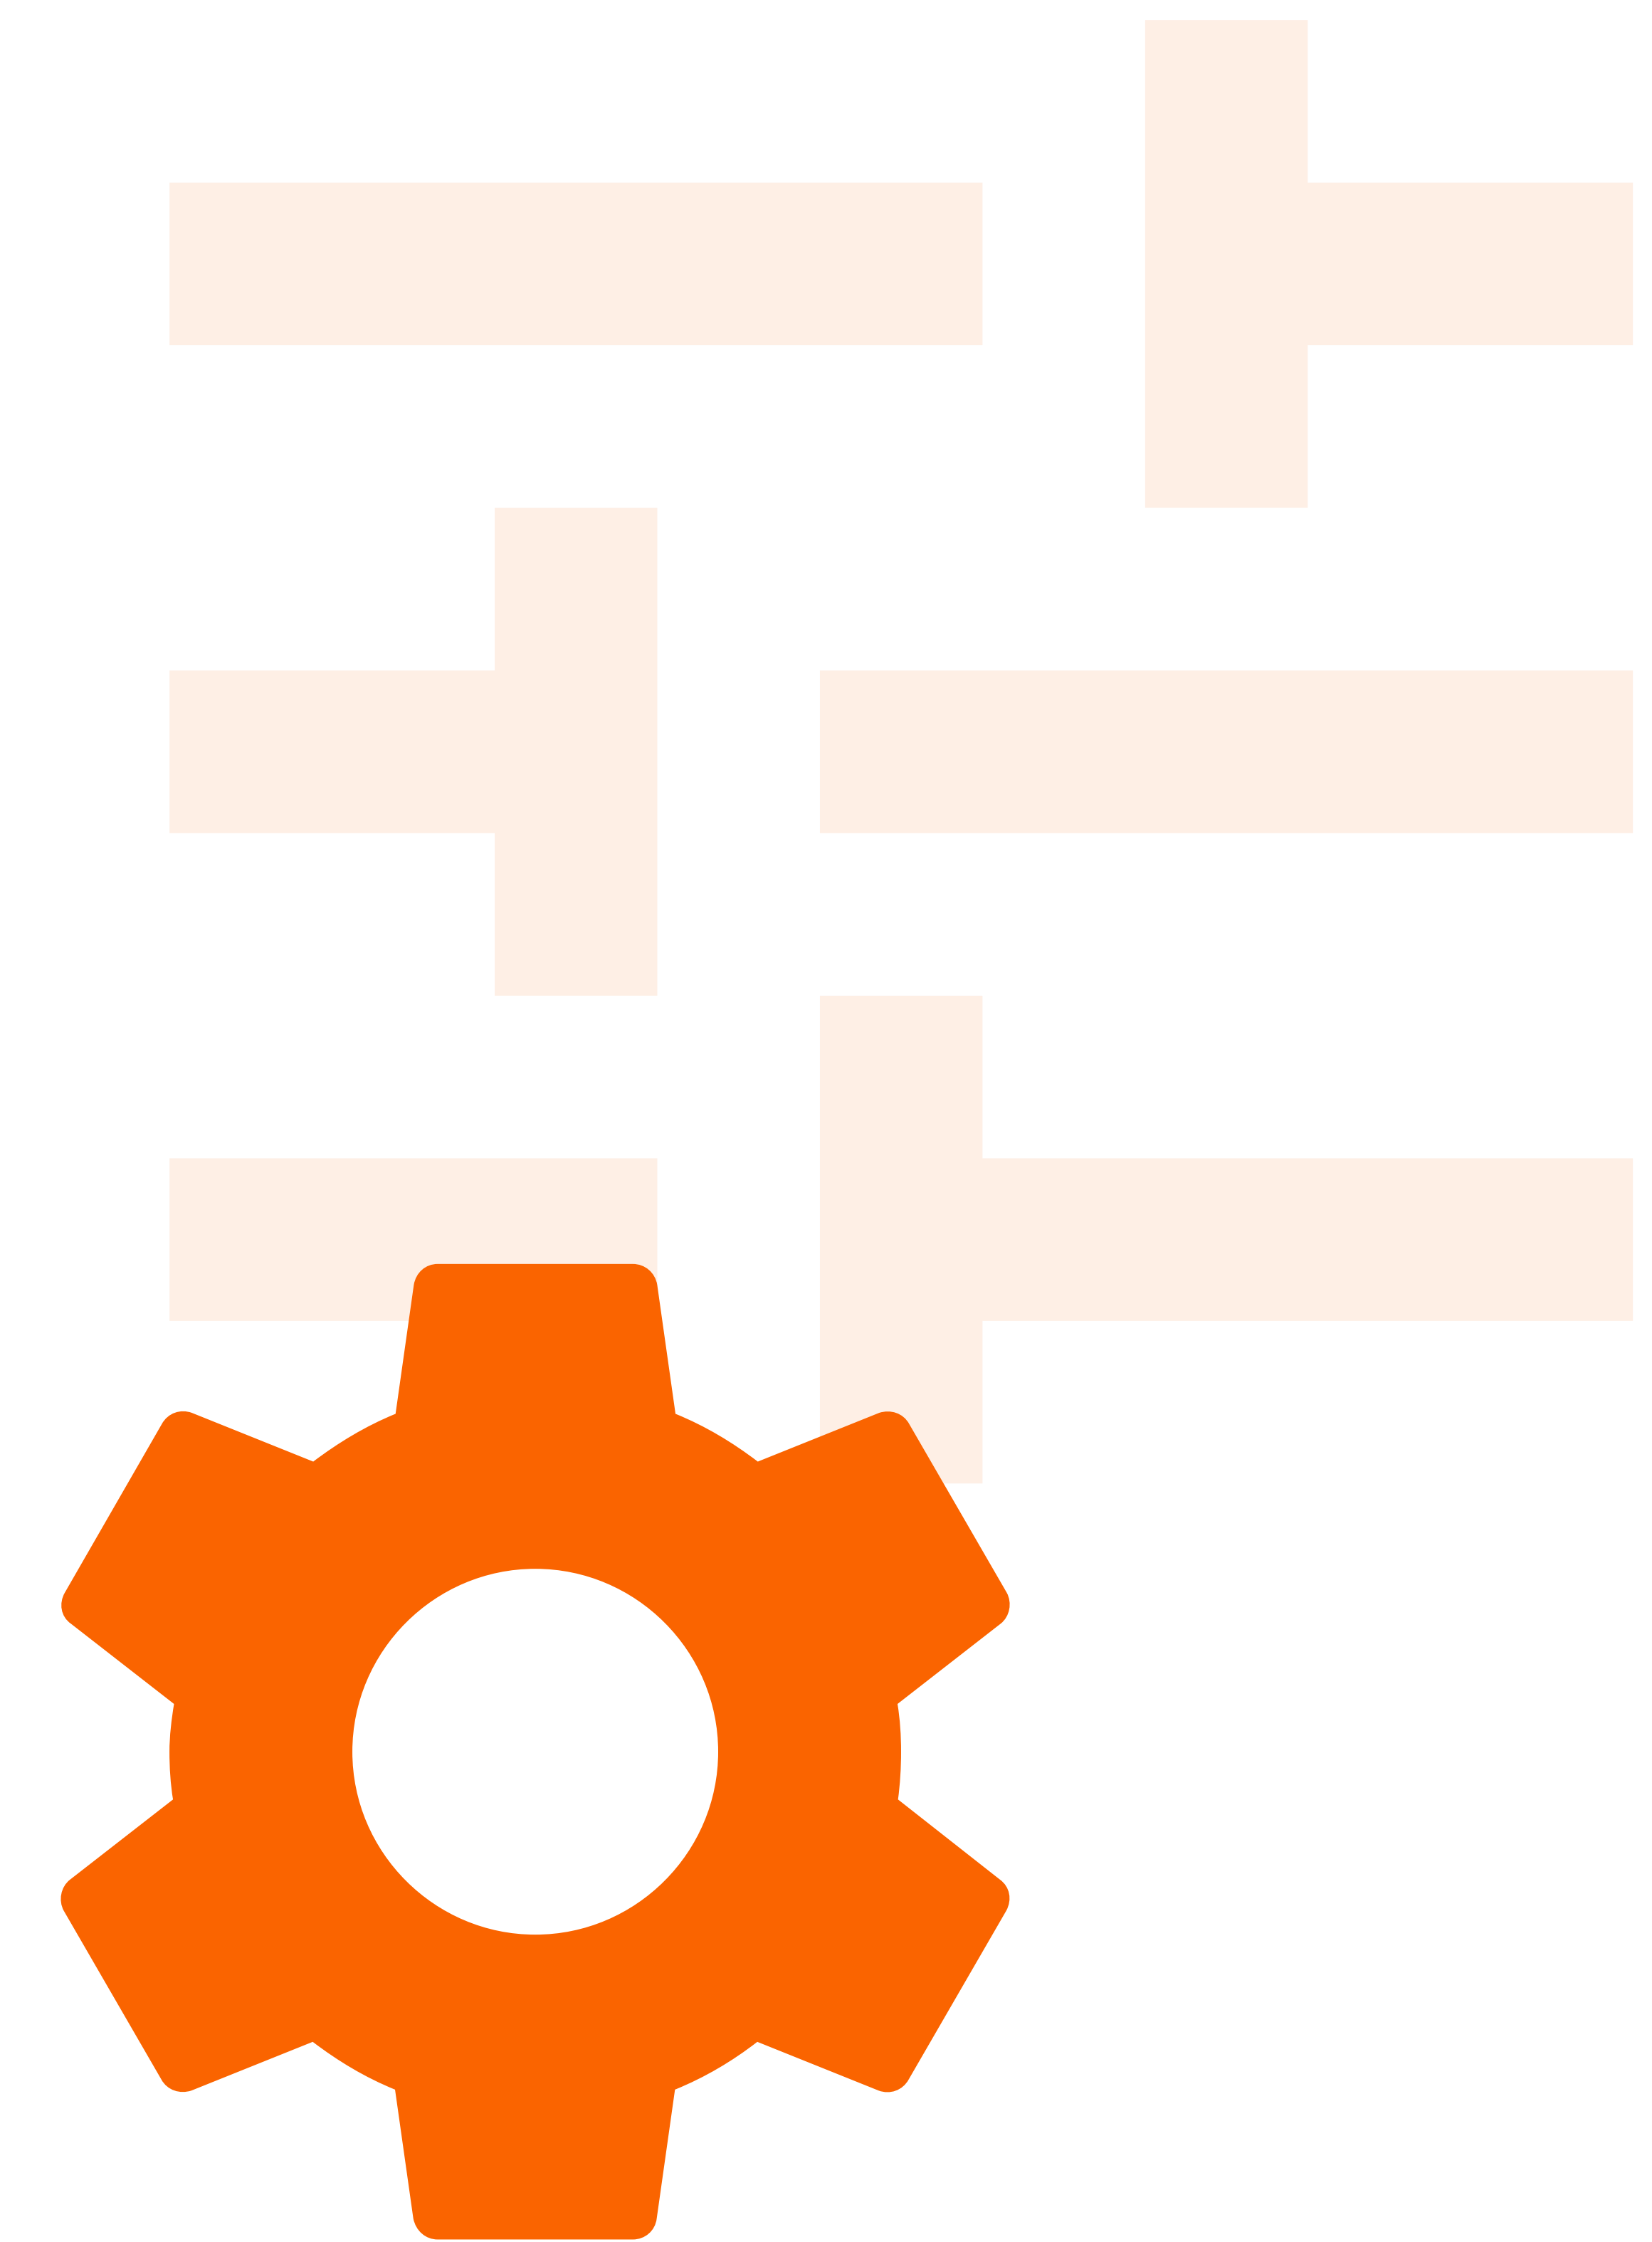

FEATURES

Push computer-specific settings

Change any Control Panel setting across your environment

Rename computers, reclaim disk space and setup auto-lock policies

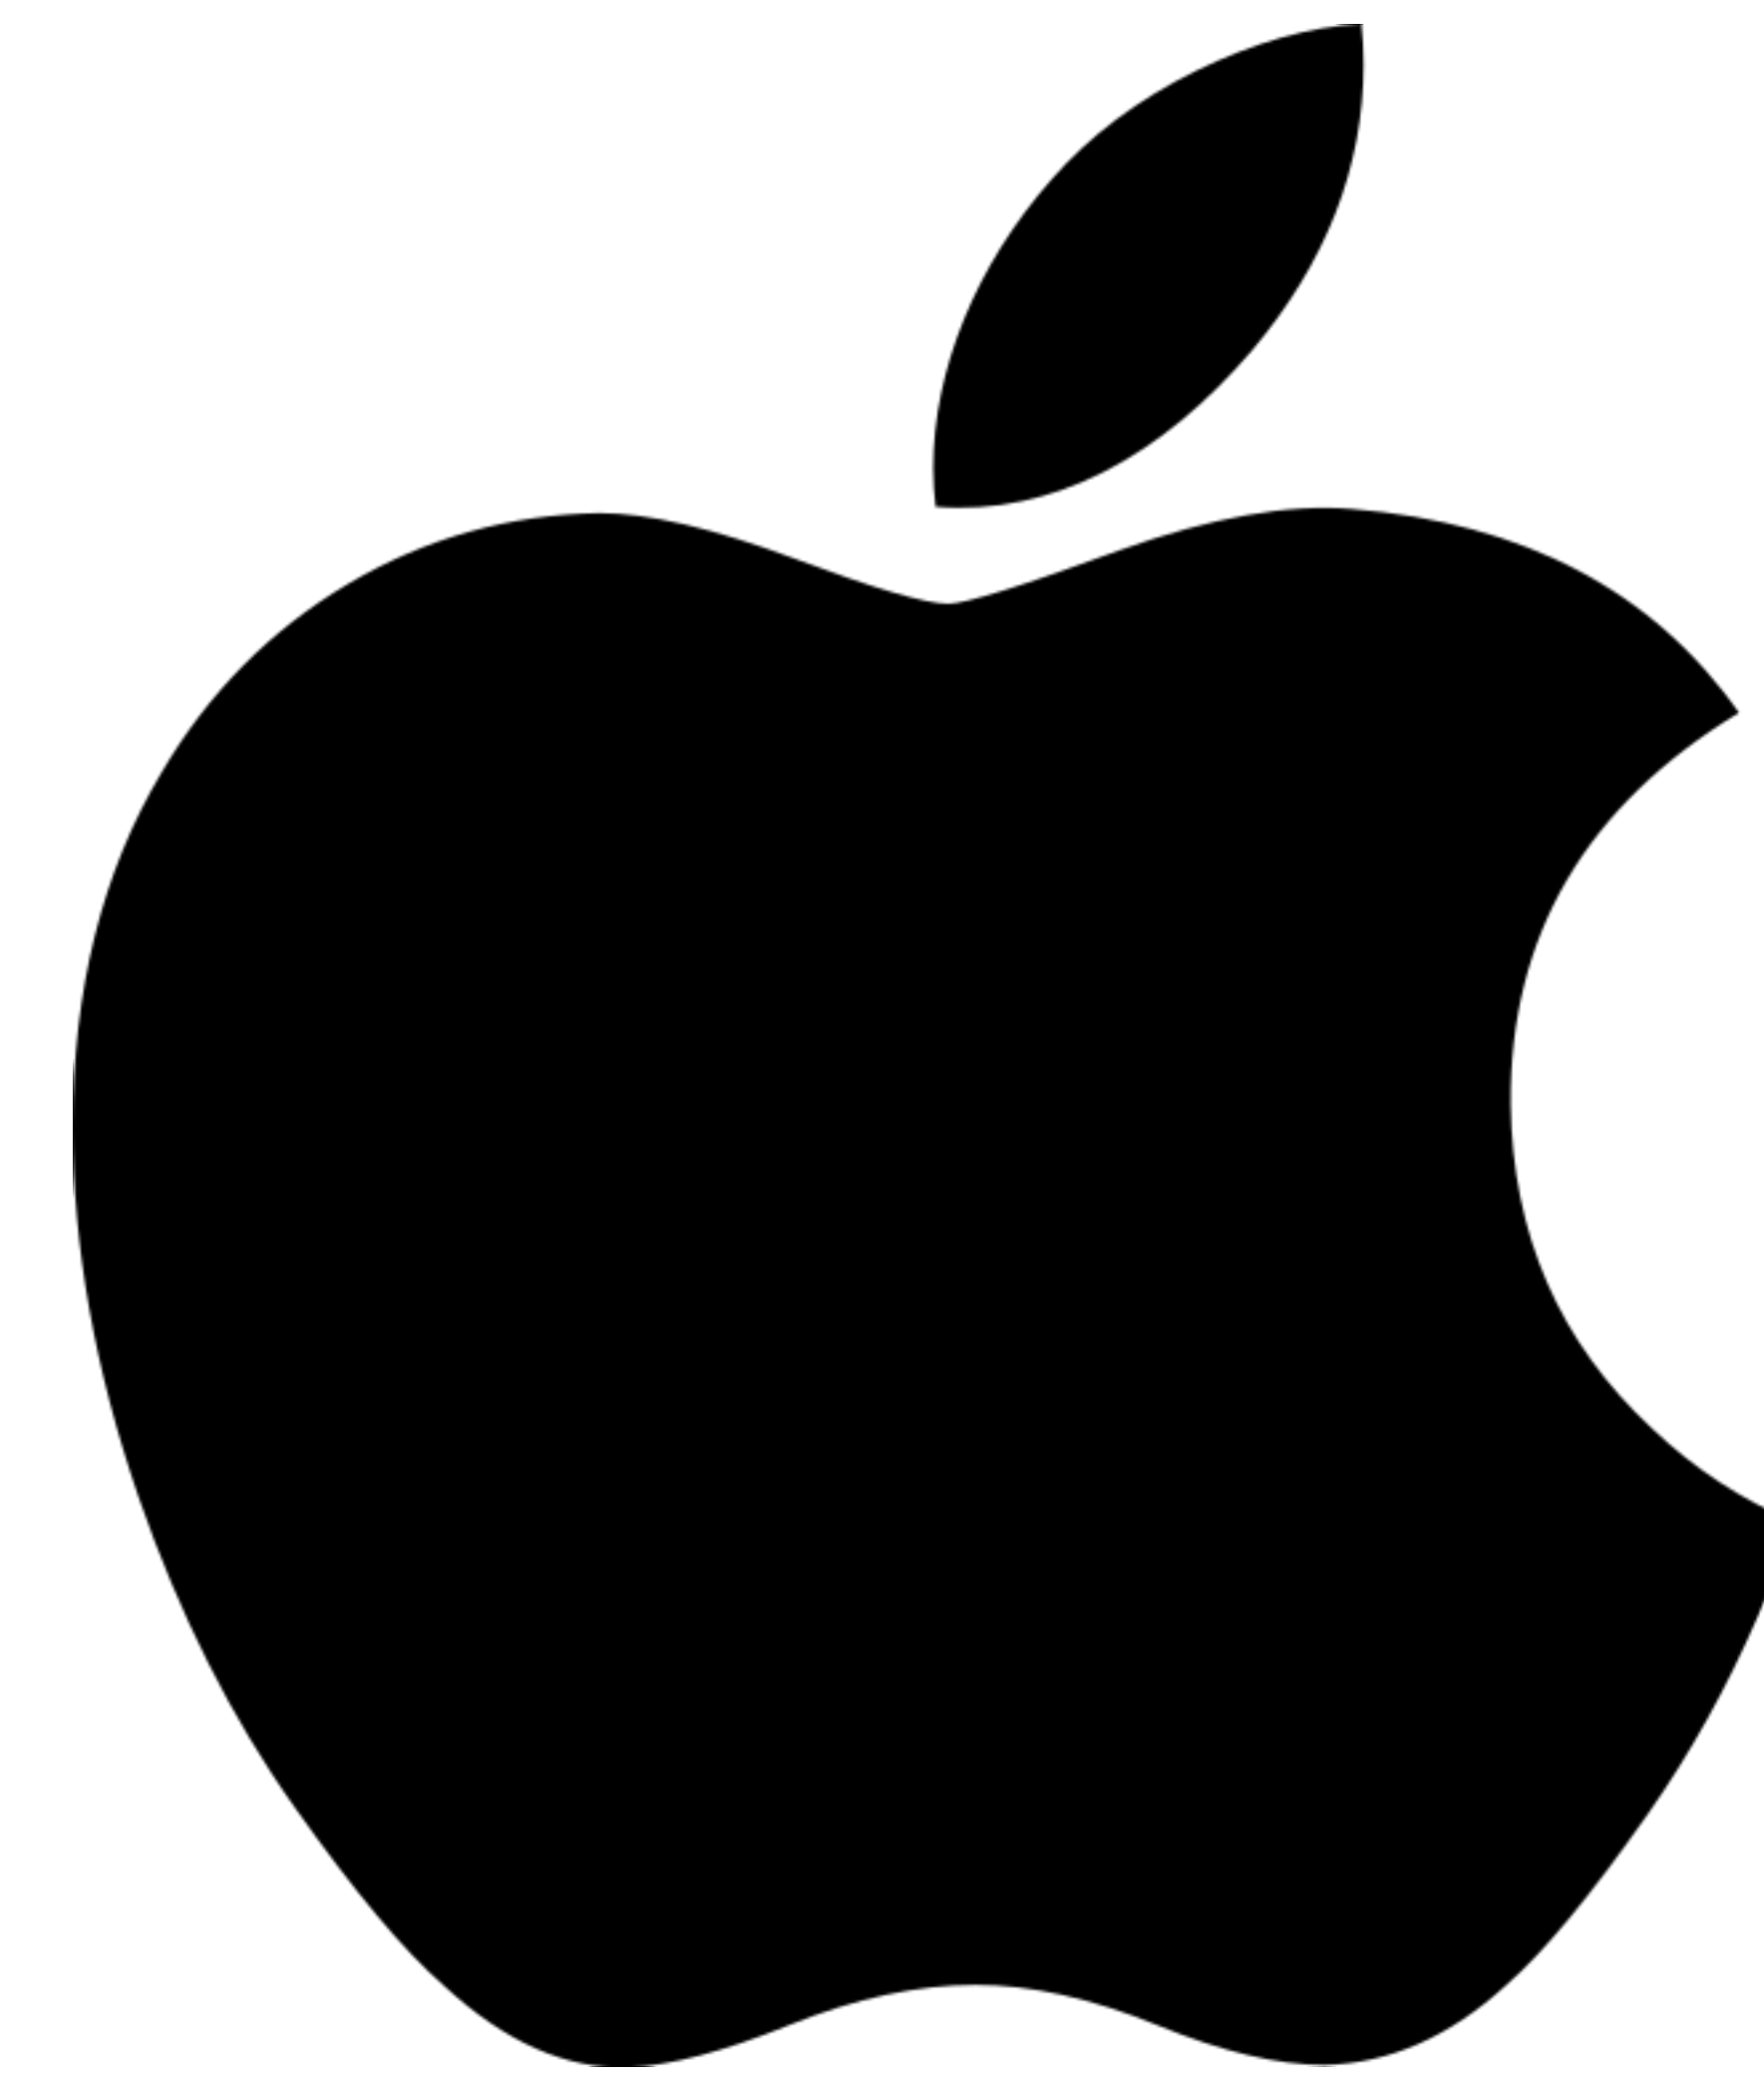

Send Custom Notifications, disable startup items and more

MANAGE macOS

SET UP, DEPLOY AND AUTOMATE UPDATES FOR ANY APP ON macOS

Faronics Deploy for Mac allows you to install/uninstall/update applications on macOS, including apps from the App Store. Administrators can also push out custom scripts to Macs as well as remotely connect and control Macs in and out of the network.

FEATURES

Install/Uninstall/Update applications

Automate Updates for App Store

Remote-in over the web to control Macs

Remote Script Execution

ANTI-VIRUS AND FIREWALL

HIGH PERFORMANCE ANTI-VIRUS WITH REAL-TIME MANAGEMENT CAPABILITIES

Get comprehensive protection for all your Windows computers with Faronics AV. Manage Faronics Anti-Virus on your endpoints across multiple locations from a web console. It offers detailed reporting on protection status, scan history, quarantined files, firewall network traffic and a lot more.

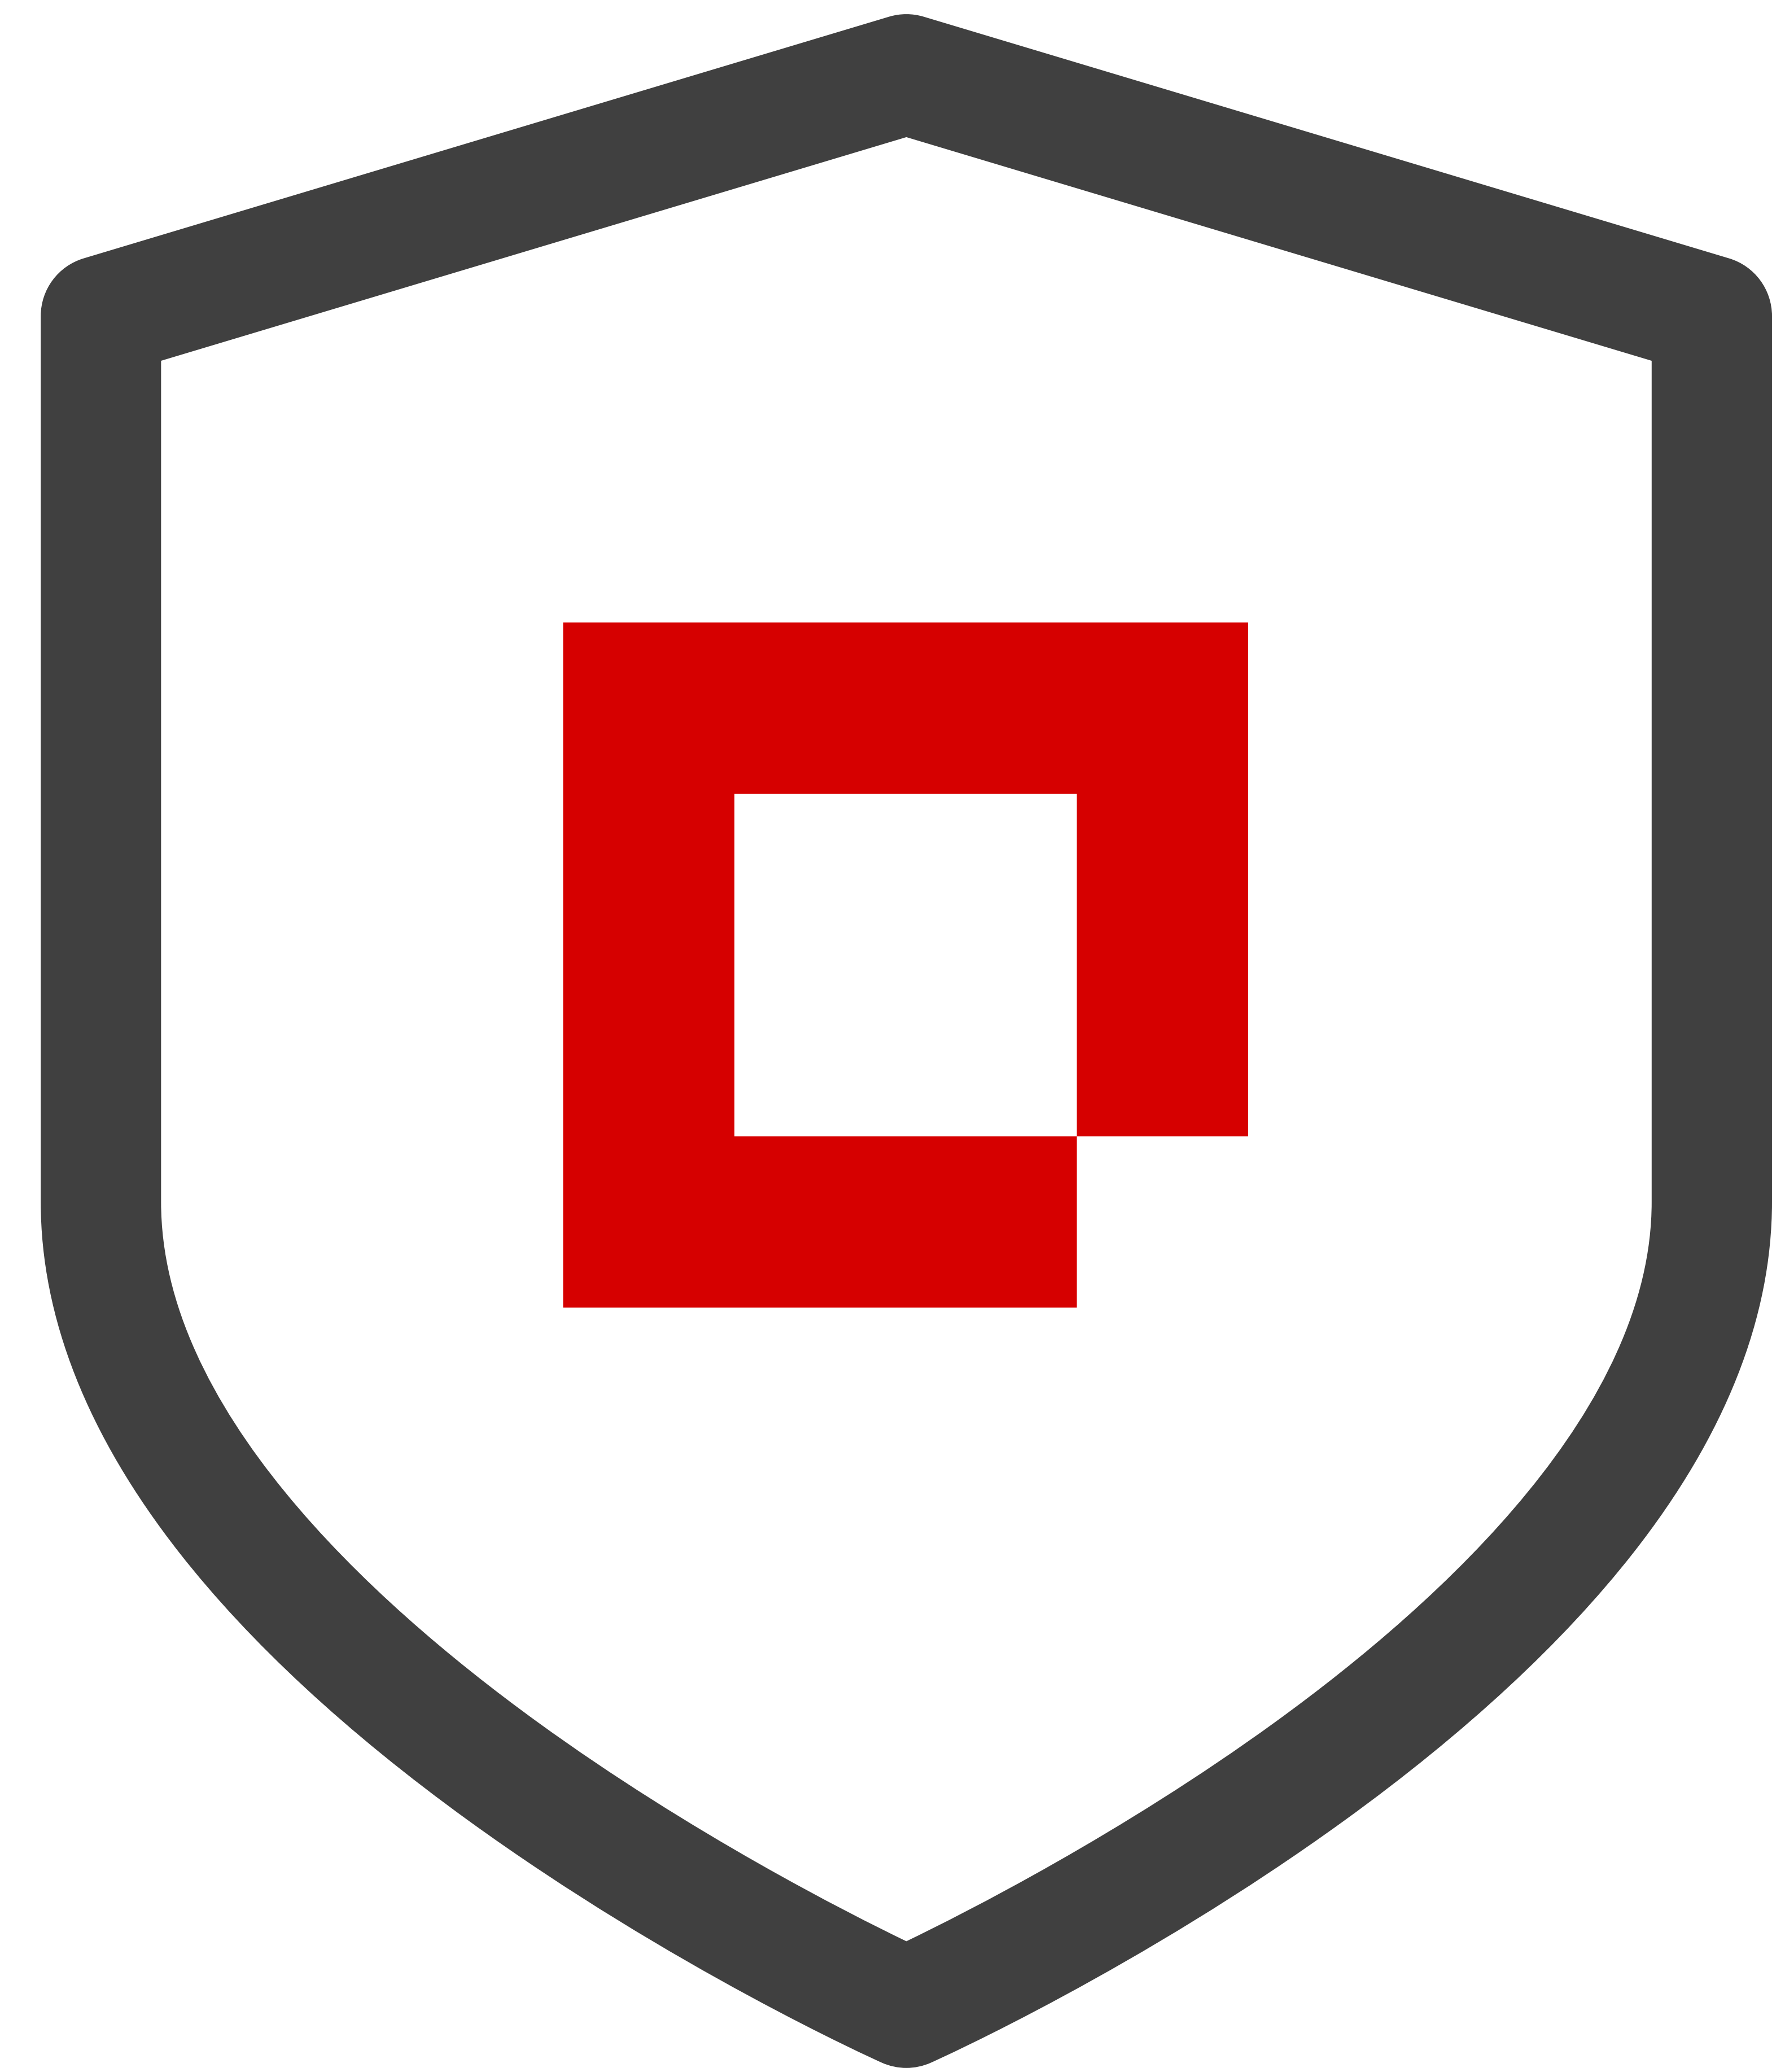

FEATURES

Active malware detection

Manage AP/Firewall with real-time controls

Get Threat Detection alerts and reports

Built-in firewall protection against network attacks

LOOKING FOR THE RIGHT SOLUTION FOR YOUR BUSINESS NEEDS?

Faronics delivers software that helps manage, simplify, and secure computing environments.
